Journal of the Textile Machinery Society of Japan. (Journal, magazine, 1955) [skynet2550.us.to]

These solutions can be represented temperature distribution of organ. A 'bubble flow model' simulates the detailed bubble behavior in a cavitating flow. ISSN stands for International Standard Serial Number.

Prediction of cavitation intensity and erosion area in centrifugal pump by using cavitating flow simulation with bubble flow model — Tokyo University of Science

Furthermore reaching time to steady state, or the time that biological tissue becomes steady state, is calculated by using these solutions. Some simple numerical results of two-dimensional finite strain elasto-plastic problem are also presented and discussed.

Sen'i Kikai Gakkai shi = Journal of the Textile Machinery Society of Japan. (Journal, magazine, 1972) [skynet2550.us.to]

AB - In this paper, a theoretical analysis for predicting the mechanical properties of lattice structures under compressive loading is proposed, and verified by comparing the analytical predictions with FEM results. Description: 45 volumes : illustrations ; 26-29 cm Other Titles: Sen'i Kikai Gakkai shi. The pipes have many scratches with a depth of about 1 μm formed by extrusion on their outer surface.

Nihon Kikai Gakkai Ronbunshu, B Hen/Transactions of the Japan Society of Mechanical Engineers, Part B

Our code is thus effective for estimating the cavitation intensity and predicting the erosion area around the impeller of a centrifugal pump.
