## Ifewara town in Atakumosa West Local Government Area of Osun State Archives

Unmet need was reported more by wives 22 percent than their husbands 16 percent. While targeted interventions have been implemented for several years, these have largely focused on HIV prevention and the management of sexually transmitted infections STIs.

## Village planning in Oyo State of Nigeria (1991 edition)

It is in this context that the USAID funded HPI project assisted the Government of Jharkhand GoJH to develop a state FP strategy with specific emphasis on reaching poor and marginalized populations living in rural, urban, and tribal areas.

## Ifewara town in Atakumosa West Local Government Area of Osun State Archives

The number of clusters was determined by the total population of each village in addition to the extra population added to it from the village preceding it in the table. Data were collected using paper-based, face-to-face interviews.

## Ifewara town in Atakumosa West Local Government Area of Osun State Archives

In 2005, Aastha also began to offer client-initiated FP counseling services during HIV counseling and STI management sessions. Most women 66% did not have any children and 6% reported a desire to become pregnant within the next six months.
