## The Sales Pipeline Management Handbook

Flare fittings and compression fittings are intended for use on soft-temper copper piping and tubing. Since 1925, this method of joining pipe has been used reliably on steel and iron pipe in HVAC, fire protection, process piping and related applications.

## Acidic Corrosive Water Detection, effects, cures for low pH aggressive water

In addition to flare and compression fittings there are also other mechanical connectors that now work with soft or hard copper that do not require soldering. Since primitive man first discovered copper, the red metal has constantly served the advancement of civilization. As a company that coordinates the logistics of moving large shipping containers from point A to point B, Epic Freight relies on developing and tracking relationships that are ongoing and expanding.
