Edited by Added goodreads ID. Description: The Accounting Review is the premier journal for publishing articles reporting the results of accounting research and explaining and illustrating related research methodology. The article examines the role of statistical sampling as a social phenomenon complicit in modifying and controlling the accounting profession's abstract system of knowledge.

Carmichael and Winters present an analysis of the history of audit reporting. The second reason that the proceedings are of special interest to historians is their utility as a part of a unique, continuing record of current discussion. The high quality of the comments reflects the beneficial practice of providing papers to participants in advance.
