

Because the critical minerals on the final list are administered under existing mineral disposal laws and regulations, any recommendations to improve

permitting processes for those critical minerals will improve permitting processes for all minerals administered under the same laws and regulations by the Bureau of Land Management and other Federal land management agencies. The Department of the Interior also recognizes that many public comments addressed issues not directly associated with the development of the critical minerals list. The comments are available for public viewing at under docket DOI-2018-0001.

#### **EURACTIV special report on critical raw materials in Europe**

These kinds of essential components are embedded in advanced electronics used in everything from satellites and cruise missiles to drones and cellphones.
