Winter Gardening in the Maritime Northwest: Cool

Simply cut the ends of the PVC at an angle to make a point, bend it into a croquet-hoop, and push both ends into the ground. Mulch should be removed in late winter or early spring, both to allow the soil to warm, and to not deplete the nitrogen availability to your early spring plantings.

Winter Gardening in the Maritime Northwest: Cool

The temperature under the mulch will be higher than in free air, as long as you apply the mulch before your ground is frozen. I've been pretending to garden at a community garden since 2009, and I started winter gardening with garlic 3 years ago, I think. Place these hoops every 3-4 feet, oriented over your garden row or bed.

Winter Vegetable Gardening

This book has lots of useful information. The Winter Gardening book for the Pacific NW. In a friendly and personal style, Binda Colebrook shows how to select a winter growing site, what Winter Gardening has become the essential handbook for Northwest gardeners who have discovered the benefits of our modified Mediterranean climate and its forgiving winters.

Our Maritime Northwest Garden Guide — Tilth Alliance

Being about 15 miles from Puget Sound, though, my experience has been that my garden's daytime high temperatures are a few degrees higher, and my nighttime temps a few degrees colder, than in many locations closer to Puget Sound. Don't dawdle in sowing this one! As long as you never step on the beds, and don't leave them bare through the winter, you probably won't have to remake them for many years.

Winter Vegetable Gardening

But the key to substantial savings on your food bill is putting fresh, homegrown produce on your table every month of the year. I tend to think that

a trip down the produce aisle in winter will let you answer this yourself. I've gotten away with sowing them in November; they will grow a little even in winter, during any spells when temps are above freezing! They are a bit more involved to build, but I think they're worth the effort.
