New Mexico state officer killed, suspect dead after post

He was hospitalized at the time of his death, DOH indicated. This number may include individuals who tested positive for COVID-19 out of state but are currently hospitalized in New Mexico.

Details

Contreras was repairing a back gate near I-10 when he and his crew of four others heard sirens. The number decreased to 22 on Saturday and on Sunday the number was 17. Mehringner arrived at FAU in December 2019 from Texas, where he spent three seasons as a pass game coordinator and wide receivers coach.

New Mexico state officer killed, suspect dead after post

The total number of COVID-19 deaths in New Mexico stood at 2,749 as of Monday morning, per DOH numbers. The Carlsbad area zip code of 88220 was No. MORE: As of Sunday, there were 682 individuals hospitalized in New Mexico for COVID-19.

New Mexico official, who founded 'Cowboys for Trump,' arrested in connection with U.S. Capitol riot

He stood on the steps of the building but did not enter it. The individual was hospitalized and had underlying conditions.

In the latest week, 87,590 tests were administered; a week earlier, that figure was 63,943. Adding the most new cases overall were Bernalillo County, with 1,378 cases; Dona Ana County, with 673 cases; and San Juan County, with 458.

New Mexico reports 13 new deaths, 315 additional COVID

The individual had underlying conditions. The individual was a resident of the Good Samaritan Society Grants facility in Grants. Experts say it is important to look at the share of tests that come back positive, not just case counts, to get a better idea of whether the rate of new infections is changing or if differences in testing are playing a role.
