The Forgotten Childhood: Why Early Memories Fade : Shots

Here are thoughts you have that may indicate you are repressing trauma.

The Neuroscience of Recalling Old Memories

But a child in one of Peterson's studies recalled an event from when he was just 18 months old. Recalling old memories can have a cinematic quality. By realizing and working with my subconscious influences and consciously choosing which ones I allowed to impact me and intentionally inserting new ones, I changed my past.

The Neuroscience of Recalling Old Memories

If you're terrified of snakes or spiders or heights without really knowing why, there just might be a repressed memory there.

The Forgotten Childhood: Why Early Memories Fade : Shots

With repetition, this practice altered the memories and neuronal paths in my brain. As records, memories are not a great problem even if they do not accurately reflect the experience.
