Emeritus Professor William Young

China accounted for around one-quarter of the global GDP until the late 1700s and approximately one-third of the global GDP in 1820 as the Industrial Revolution was beginning in Great Britain. In the area of airport planning his pioneering work is widely cited with respect to the impact of New Large Aircraft NLA on airports, terminal configurations, passenger orientation, aircraft gate estimation, large airports with PRT systems and lounge sizing. Due to increasing urbanization of the general populace, slums became common in the 18th to late 20th centuries in the United States and Europe.

DEVELOPING STRATEGY AND FRAMEWORK OF RAILWAY INTELLIGENT TRANSPORTATION SYSTEM IN CHINA

Wong, Department of Civil Engineering, The University of Hong Kong. China Brief, 7 October 2008.

A review on modular construction for high
