The Hindus did not disdain to incorporate what they found new. Byung-rTsis is pronounced Jung-Tsi, and in some English texts called Jungtsi. From the ancient 'nameless religion' of Tibet, a system is preserved in current Tibetan astrology which relates to Five Individual Forces La - vitality, Sok - life potential, Lu - bodily health, Wangthang - personal power, and Lungta - wind horse or energies within a person. JAOS 48 1928 : 250-275.

History of Astronomy and Space Science in the Islamic World

Genre: Jaina Skt — Topic: unspecified — Dating: 2.

David Pingree

Vāk 1 1951 : 80-87. In the early 1230s, after completing his education, Ṭūsī found patrons at the Ismāʿīlī courts in eastern Iran; he eventually relocated to Alamūt, the Ismāʿīlī capital, and witnessed its fall to the Mongols in 1256.

Al

Facsimile leaves, Nagari transcript, romanised transliteration and english translation with notes.
