## Courses

Combination edge-wise and round tube, and Combination edge-wise and flat oval tube used for double back arch wires. For deep overbites, the anchor bends should place the anterior portion of the archwire in the deepest part of the vestibule.

## Tip

Moving teeth apex first generates maximum anchorage resistance 2.

**Tip edge technique /certified fixed orthodontic courses by Indian...**

Stronger bite-opening bends used in upper arch to offset vertical component of force delivered by Class II elastics.

## The "tip

Close any posterior spaces 2. Neither author has a financial interest in TP Orthodontics or the Tip-Edge bracket. Continuous retraction forces are provided by elastomeric modules that are replaced as needed at regular appointments.
