These included inaccurately framing homosexuality as a psychological disorder needing referral for treatment, and discussion of ways to dissuade the patient from having homosexual sex. Systematic review and meta-analysis: prevalence of alcohol use among young people in eastern Africa.

## Understanding Factors that Shape Gender Attitudes in Early Adolescence Globally: A Mixed

Storch EA, Strawser MS, Storch JB. Treatment and follow up measures Establishing rapport Participants stated the first thing they would do is to establish a good rapport with a patient by being friendly, respectful, encouraging open communication between them and allowing the patient to feel comfortable by assuring him privacy and confidentiality. Ten schools from each stratum were randomly sampled proportional to the size of the school.

## Cultural and clinical challenges in sexual health care provision to men who have sex with men in Tanzania: a qualitative study of health professionals' experiences and health students' perspectives

Four of the articles that adopt a sociocultural perspective on identity development demonstrated, based on classroom observations and teacher interviews, that teachers may have rather persistent expectations of adolescents through which certain identity positions are made available or unavailable Berg ; Rubin ; Vetter ; Wortham. Both qualitative and quantitative approaches were utilized in the study.

## Cultural and clinical challenges in sexual health care provision to men who have sex with men in Tanzania: a qualitative study of health professionals' experiences and health students' perspectives

Then, it would be easy for the subsequent care provider to note what has been previously done to the patient. As is shown in Table in Appendix B Online Supplement , these articles comprise one theoretical paper and 15 ethnographic studies.
