This classic and essential work has been thoroughly revised and updated in line with the requirements of new codes and standards which have been introduced in recent years, including the new Eurocode as well as up-to-date British Standards. For the next four years he worked for CEEGB and Camus Ltd, and then joined the Cement and Concrete Association in 1970, where he was engaged primarily in education and training activities until 1993.

Written for structural engineers, contractors, consulting engineers, local and health authorities, and utilities, this is also excellent for civil and architecture departments in universities and FE colleges. Each example starts with a problem statement, then provides a design solution in a three column format? Effects due to changes in temperature and to shrinkage and creep of the concrete, and the possibility of damage resulting from overloading, local damage, abrasion, vibration, frost, chemical attack and similar causes may also have to be considered. Reinforced Concrete Design: A Practical Approach covers key topics for curriculum of undergraduate reinforced concrete design courses, and it is a useful learning resource for the students and a practical reference for design engineers.

Fashion fades, only style remains the same. His association with Charles Reynolds began when, after the publication of numerous articles in the magazine Concrete and Constructional Engineering, he accepted an appointment as Technical Editor of Concrete Publications, a post he held for seven years. The Concrete Pipe Design Manual includes a hardbound book with accompanying CD ROM.

These, together with extensive numerical examples, will enable engineers to produce rapid and efficient designs for a large range of concrete structures conforming to the requirements of BS 5400, BS 8007, BS 8110 and Eurocode 2. His lucid and thorough explanations provide the tools required to derive systems that gracefully resist the battering forces of nature while addressing the specific needs of building owners, developers, and architects.
