## Paris Agreement and Consensus to Address Climate Challenge

Often people argue that consensus works well in small groups but as groups get bigger and more diverse, it is simply impossible to find solutions that work for everybody. Consensus is not a magic wand - it is one tool among many in the fight for a fairer world. The computerization of Argument Delphi, developed by Sadi Evren Seker, proposes solutions to such problems.

## Delphi method

Alternatively, if your group is far away from meeting these conditions you may decide that consensus isn't right for you at this moment. Is the issue important enough to need the consensus of the whole group? This principle is shown here in the third figure. The process then returns to the call for consensus and the cycle is repeated until a satisfactory decision passes the consent threshold for the group.

## Delphi method

If you are keen to explain your perspective to them, it might be best to do it after a period of reflection, and perhaps after getting a second opinion on whether the things you want to say are helpful, or just defensive. Good facilitation and techniques such as splitting into small groups see below can help everyone to take a full part in the meeting. Eighty-nine percent of managers surveyed admitted to using intuition to make decisions at least sometimes, and 59% said they used intuition often.

## 6 Principles of Persuasion To Convince Anyone To Do Anything

Conversely, successful managers are clear about what they want at the outset of the decision-making process, set objectives for others to respond to, carry out an unrestricted search for solutions, get key people to participate, and avoid using their power to push their perspective.
