### Research Article

The positive effects may be because of other dietary and lifestyle factors. The other students had little knowledge about the disease and how to handle it.

### Improving Student Performance in the Summative Assessments

Body-mass index and risk of 22 specific cancers: a population-based cohort study of 5.

### Improving Student Performance in the Summative Assessments

The findings showed differences in levels of fear and disgust evoked by pictorial warning labels for each stage in the smoking decision process, which in turn led to differences in the perceived effectiveness of the labels. It was suggested that this phenomenon was present in approximately 70-80% of students in the study mentioned above. A representative sample of 1085 school children in the first through the third grades at 16 schools was selected by multistage random sampling.

### Research Article

The boxplot figures were drawn using medCalc. Our findings suggested the importance of prevention programs for preteen aged children, public education to raise awareness, and further prospective studies to identify various risk markers for CSA in Asia.
