Vegetable oils were also used as emergency fuels and for other purposes during World War II.

History of Vegetable Oil

Unfortunately biodiesel produced from oil crop, waste cooking oil and animal fats are not able to replace fossil fuel. Historical perspective on vegetable oil-based diesel fuels. The viability of the first generation biofuels production is however questionable because of the conflict with food supply.

Historical perspective of biofuels: learning from the past to rediscover the future

Once again, energy security perspectives have become a significant driving force for the use of vegetable oil-based diesel fuels, although environmental aspects mainly reduction of exhaust emissions play a role at least as important as energy security.
