Recurrent Fever: What It Is, Symptoms, Causes & Treatment

The name of the Countess of Chinchon was thus indelibly linked with this great discovery.

Evaluating Cinchona bark and quinine for treating and preventing malaria.

It is related that 800,000 persons perished in Numidia alone; 200,000 on the sea coast of Carthage and Utica, and 30,000 of the Roman troops. In Philadelphia, in 1836, an epidemic typhus appeared, but was confined chiefly to a portion of the town inhabited by the lowest and filthiest blacks.

ShieldSquare

Therefore the pesti lence under Gallus, could not be a consequence of a famin under Probus, which was 25 years later than the plague ascribed to it. Later in the disease, when typhoid symptoms are formed, local inflammations and local congestions frequently appear as in typhus, and more frequently than these secondary disorders are observed to show themselves in the early stage.

Historical Medicine Bibliography

It is really surprising that, if the fact is well evidenced, that a plague proceeding from one country is more malignant than one proceeding from another, men of extensive erudition and observation should not undertake to assign some rational cause for the phenomenon, rather than to

propagate the vulgar tales and opinions of the Egyptians.

Fever

But no other topic has attracted so much attention during the last five- and-twenty years, or has been investigated with more success, so far as the accumulation of facts goes.

treatise febrile diseases

First, the blood of all 734 inhabitants was examined for parasites. At the same time he contends that the infecting principle is generated in Africa or Asia, and conveyed to other countries. In the year of Rome 300 according to Livy and the common chronology and B.
