Achievements in Public Health, 1900

Even in 1964, however, the evidence for adverse health consequences of cigarette smoking was sufficient for the Committee to conclude that cigarette smoking is a health hazard of sufficient importance in the United States to warrant appropriate remedial action US PHS 1964, p.

Tobacco Control and the Reduction in Smoking

In an observational study, this sequence may be reversed by the tendency of persons with initial symptoms of a cigarette-related disease or with frank disease to reduce cigarette consumption or to stop smoking Chapter 2. However, the pattern of changing risk after cessation must be interpreted in the context of the mechanism of disease causation by active smoking. Large epidemiologic studies conducted by Ernst Wynder and others in the 1940s and 1950s linked cigarette smoking and lung cancer.
