The Role of Family in Dealing with Juvenile Delinquency

Results: An analysis of research literature suggests that family-based risk and protective factors vary with respect to the age of the youth. There are also important problems with the choice of statistical models to create categories of developmental trajectories Nagin and Tremblay, 1999. Movies and popular music, rather than direct connections between cities, seem to be at least partly responsible for this copying of gang terminology between cities Decker and Van Winkle, 1996.

Juvenile Delinquency

Juvenile detainees are a particularly vulnerable group in the penitentiary system. Family Influences In assigning responsibility for childrearing to parents, most Western cultures place a heavy charge on families. Females in the Denver sample exhibited a peak in serious violence in midadolescence, but prevalence continued to increase through age 19 for the boys.

Juvenile delinquency, the family and the social group; a reader. (1972 edition)

Communities in which criminal activities are common tend to establish criminal behavior as acceptable.

Juvenile Delinquency: Causes and Effects

Paper prepared for the Pan-Canadian Education Research Agenda Symposium, Sponsored by the Canadian Education Statistics Council, with the assistance of Human Resources Development Canada. First, these patterns do not hold true for minor forms of delinquency.

Juvenile Delinquency: Causes and Effects

Although they are risk factors, low birthweight and premature birth do not necessarily presage problems in development. Girls who do exhibit aggressive behavior or conduct disorder exhibit as much stability in that behavior and are as much at risk for later problems as are boys. Table-1 Most Important Social problems Frequency Percent Unemployment 6 24.

Juvenile delinquency, the family and the social group; a reader. (1972 edition)

For example, leaving homes and addicted to vices and the like from parental and family neglect, lack of supervision and guidance. Mucchielli, the relationship between delinquency and single-parent families is often the result of a twofold stigma. This section outlines what is known about the effects of some of the major school policies that have a particular impact on adolescent delinquents and those at risk for delinquency.

Juvenile Delinquency and Parental Role

The family structure plays an important role in shaping a child by providing security and developing their, values and skills. After the second time, measures of the accessibility of aggressive concepts showed a cognitive effect of playing violent video games. According to the results of the National Longitudinal Survey of Children and Youth NLSCY , peer influence is a stronger risk factor than parental drinking for consumption of alcohol by adolescents.

The Role of Family in Dealing with Juvenile Delinquency

Lastly, for each family, there are two intermediate goals: helping the young people form bonds of affection with their parents, and building positive and lasting relations with peer groups.
