## Evidence

Interactions between nurses during handovers in elderly care.

## DISCHARGE PLANNING FOR Elderly Patients

SBAR communication tool is a structured communication tool which has shown a reduction in adverse events in a hospital setting. Also, because KATH is a referral point for many hospitals and clinics we admit people from mostly Nigeria and China and its quite difficult talking to those who cannot speak English, sometimes we have to resort to sign language and even that we are not good in it.

## What Is Community Health and Why Is It Important?

Drug and grocery store delivery services were available for only 18% of patients.

## Evidence

Communication is a crucial component in all steps of the health care process.

## NHS nurses are too busy to care for patients properly, research shows

Receiving bad news: Clarity Recognising that their relative was dying was a critical point of transition for carers. Discharge planning: Issues and challenges for gerontological nursing: A critique of the literature. Emergence of Telehealth in America.

## Patient narratives 1: using patient stories to reflect on care

According to the American Association of Nurse Practitioners, nurse practitioners provide equivalent or improved medical care at about one-third of the cost of physicians. International Journal of Environmental Research and Public Health, 10 12 , 6472-6484.

### **Discharge Planning**

Such things as day hospitals, day rehabilitation centers, and hospitalbased extended care facilities may provide alternative sites for the needed services for elderly patients.

### **Evidence**

Over-reliance on written materials should not replace individualised care. The interview guide contained interview questions on the demographic profile of nurses and patients as well as interview questions on Nurse-related barriers; Patient-related barriers and Environmental-related barriers to Therapeutic Communication.
