The effect of computerized physician order entry on mortality rates in pediatric and neonatal care setting: Meta

Reprinted with permission from Aldo Vacca, MD.

The effect of computerized physician order entry on mortality rates in pediatric and neonatal care setting: Meta

In our experience, we have found that staged implementation is often desirable, because it allows for formative evaluation that can be used to improve the implementation process. Then, the data were exported to SPSS for windows version 20.

A review of infant cry analysis and classification

Agarwal S, Srivastava K, Jha PK, Baqui AH. This model was developed independently, but is similar to the work of Fuhrer and colleagues, whose framework of assistive technology device outcomes is patient-centric. Outcomes of Technology Use As Fuhrer and colleagues noted, a paucity of outcome measures is a significant barrier to the conduct of outcomes research related to technology.

Preventing Maternal and Neonatal Harm during Vacuum

Zero-crossing rate is the rate at which the signal passes zeros and changes signs.
