

# Cancer care nursing - a flexible learning programme.

## Marie Curie CancerCare - Cancer Nursing Careers

TABLE 1. Sample Characteristics by Group (N = 54)

Characteristic	LMG (N = 27)		CG (N = 27)		p
	$\bar{X}$	SD	$\bar{X}$	SD	
Age (years)	44.7	11.4	46.1	10.4	0.646
Length of time practicing (years)	18.4	10.5	20.6	12.3	0.498
Amount of moderate intensity physical activity per week (minutes)	64.1	55.9	69	65.4	0.767
Amount of vigorous intensity physical activity per week (minutes)	69.1	79.9	92	126.8	0.268
Amount of moderate to vigorous intensity physical activity per week (minutes)	123.1	125.8	161	183.8	0.298
Amount of resistance training per week (minutes)	16.7	38.5	33.5	48	0.16
Characteristic		n		n	
Area of specialization*		19		19	
Chemotherapy		8		7	
Radiation therapy		4		6	
Surgical oncology		4		6	
Bone marrow transplantation		2		4	
Supportive		9		13	
Other		23		22	0.865
Ethnicity*		3		2	
Caucasian		1		1	
Asian/East Indian		1		1	
African		1		1	
African descent		1		1	0.313
Gender		26		27	
Female		1		1	
Male		10		15	0.172
Residency		17		12	
United States		5		5	
Type of cancer specialization*		6		9	
All type		3		6	
Breast		1		4	
Lymphoma/leukemia		1		2	
Lung/thoracic		1		2	
Gynecologic		1		2	
Colon/gastrointestinal		1		2	
Other		5		5	

\*Multiple responses were permitted.  
 \*N = 26 in the CG because of one nonresponse  
 CG-control group; LMG-learning module group

### Flexible Work Options in Health Care Can Result in a Win

This course is delivered in part-time mode. At Casey, some direct-care workers are allowed to work from home to complete administrative tasks like charting.

### Cancer Nursing Care Plans: 13 Nursing Diagnosis

If you do not confirm your professional experience or maintain access to a relevant practice setting, you will not be able to complete the clinical assessment components required to complete units in the study area.

### Cancer Nursing Care Management and Study Guide for Nurses

Such education plans are mandatory for promoting the best nursing practices.

### Cancer Nursing Care Management and Study Guide for Nurses

Uses intravenous injection or ingestion of radioisotope substances followed by imaging of tissues that have concentrated the radioisotopes.
