## As 2020 Closes, Many Questions Remain about Youth Substance Use Trends

Although some substance use may be developmentally routine, a concerning number of adolescents meet criteria for a substance use disorder and could greatly benefit from a quality treatment experience. Further, verbal skills may serve to magnify positive expectancies of substance effects and may require focused interventions.

## Advances in adolescent substance abuse treatment

Clinical perspectives on the assessment of adolescent drug abuse Kenneth C. Adolescence treatment services: the context of care M. The aims of this study were to evaluate the feasibility of sample ascertainment and assay procedures for cortisol and serotonin receptor characteristics in a subsample of 76 adolescents with MDD, CD, and SUD who were participating in aforementioned controlled trial of fluoxetine + CBT versus placebo + CBT.

## Adolescent Substance Abuse

The MTF data collected at the beginning of this year reflect a certain point of relative normality before the COVID-19 pandemic threw all our lives into upheaval, including the lives of teens.

## Interventions for Adolescent Substance Abuse: An Overview of Systematic Reviews

Recent methodological and statistical advances: a latent variable growth modeling framework Terry E.

## Advances in neurobiological research related to interventions in adolescents with substance use disorders: Research to practice

The authors cover a range of issues, including empirically-based treatment development protocols; how to incorporate innovative treatment models

into diverse clinical settings; research advances; interventions with special populations; culturally based intervention guidelines, and recommendations for practice and policy.

**Adolescent substance abuse : research and clinical advances (Book, 2007) [skynet2550.us.to]**

The human adolescent brain and alcohol use disorders.

**Adolescent substance abuse: Research and clinical advances — University of Miami's Research Profiles**

As their children grow to pre-teens and teens, parents worry about new risks they may experience.
