**The Birds of Washtenaw County Michigan by Kielb, Michael A.**

Summer bird has rust-brown upperparts, head, breast, white eye-ring, orange-red eye comb, white wings, belly, leg feathers; brown tail. Typically, around 65-75 bird enthusiasts participate in collecting the data, but this season saw well over 100 participants.

## Washtenaw County

Pages and cover are clean and intact.

## Bird Watching

It feeds on green plants including eel grass and sea lettuce. Edward Vielmetti reads a forest of blogs for Ann Arbor. An excellent birding spot, the fields of DeVine Preserve often produce sightings of uncommon grassland species, including Savannah Sparrows, Bobolinks, and Dickcissels.

## 2020 Best of Washtenaw

Situated to the west of Detroit in southeast Michigan, the county has an exceptionally rich history of ornithological study, fueled by the activists of numerous amateur birdwatchers and by the interests of two major universities.

## 2020 Best of Washtenaw

The bill is small and triangular.
