### Chapter 3 The Brain and the Nervous System

So an individual may show word deafness, which is an inability to recognize spoken language, or word blindness, which is an inability to recognize written or printed language. Part of the brain stem's job is to control your involuntary muscles — the ones that work automatically, without you even thinking about it.

### Your Brain & Nervous System (for Kids)

It contains threadlike nerves that branch out to every organ and body part. This system relays information from your brain and spinal cord to your organs, arms, legs, fingers and toes. Because of your cerebellum, you can stand upright, keep your balance, and move around.

### Brain and Nervous System Cancers

Scientists think that the right half helps you think about abstract things like music, colors, and shapes. Darwin, proposed two forces of natural and sexual selection as work engines behind this change. It does this via the spinal cord, which runs from the brain down through the back.

### The Brain and Nervous System

It also helps the move along so our bodies can efficiently take in nutrients from the food we eat. Along the way, various nerves branch out to the entire body.
