On the plastic segment P9 P10 conditional stresses vary according to the equations 206 6 Elastic—Plastic Waves in a Loosened Material Fig. In the case that a matrix  $A$  is symmetric and satisfies a condition of nonnegative definiteness and a set  $F$  is convex, the problem 3. Kemudian dalam kebutuhan manusia terhadap harta ada yang bersifat dharuri primer, haji sekunder, dan tahsini pelengkap.

## Gas Dynamics

American Mathematical Society, USA 1991 23. Besides, comparison of the received results with a two-dimensional case is carried out. Modelirovanie 13 5, 62—74 2001 39.

## Gas Dynamics Equations: Computation

When modeling finite strains of a thread, it is necessary to take into account restrictions from below related to the fact that, when changing positions of the ends in the compression process, a thread is stretched again. This theorem has an illustrative geometric interpretation: if some point of a finite-dimensional space this point can be assumed to be 0 does not belong to a convex set, then there exists a hyperplane separating it from this set. New in Foreign Science, vol.

Применение метода Галёркина к решению линейных задач оптимального управления

Аннотация научной статьи по математике, автор научной работы — Панкратов И. In terms of these functions the model 6.

### **Gas Dynamics**

The desired value  $U(t_0 + \Delta t, x)$  is equal to  $U(t_0 + \Delta t, x)$ .

### **Numerical methods in radiative gas dynamics**

We consider a model of the heteromolecular elasticity theory, whose rheological scheme is given in Fig.

### **Применение метода Галёркина к решению линейных задач оптимального управления**

The theorem is completely proved. The equality sign in this condition corresponds to the limit equilibrium of a granular material. At the next steps initial stresses are calculated from the strain field obtained from the previous solution.

### **Mathematical Modeling in Mechanics of Granular Materials**

The cross-section of a block and the coarser finite-element grid consisting of 623 nodes and 1123 elements are shown in Fig.
