In a pinch, a shallow trench or shell crater would do; these bodies would be exhumed later and reburied. When personal Identification Tags were missing, identification was to be attempted by members of the same organization of the deceased; this was then to be recorded and a copy of same placed either in a canteen, a bottle later Identification Burial Bottles, or other container and buried with the body. But the destructiveness of modern weapons often made identification time-consuming and difficult—especially in the case of remains inside crashed planes or burned-out tanks, where sometimes all that could be found were melted rings, teeth, and dog tags.

In the end, it was thought that a small generator would help provide power to properly light both the morgue and office, instead of gasoline lanterns which did not produce sufficient light. But the 607th was bloodied five weeks before the fight, when German patrol boats attacked an invasion rehearsal off Slapton Sands, England. The families of the remaining 109,866 decided to leave their loved ones overseas.
