Pediatric and Adolescent Gynecology

Recognising common variations and problems from more significant problems in pubertal development and in the menstrual cycle is important in the care of young women.

Pediatric and Adolescent Gynecology

Our goal is to educate young women and empower them to be knowledgeable and active participants in their own health care. Everything we do is focused on the gynecologic health of children and young adults, including patients with complex medical and surgical conditions, patients who have special needs and patients who are transgender. Often, we can remove cysts with surgery using small incisions minimally invasive techniques and preserve the ovary and fallopian tubes.

Pediatric and Adolescent Gynecology

We also offer long-term contraceptives that are reliable and safe for teens, such as Mirena and the etonorgestrel implant. It also causes less scar tissue inside, making it less likely to affect fertility. Read more on PDF and PDF.

Pediatric & Adolescent Gynecology

Before puberty, it may be a sign of an infection, skin irritation, allergy, inflammation of the vulva outer part of the female genitals or having something in the vagina like pieces of toilet paper. Please note the locations below and follow the links for maps and directions. Birth control pills oral contraceptives may also help treat certain conditions, including some problems with menstrual periods.

Pediatric and Adolescent Gynecology

With our collaborative approach, we provide each patient with exactly the care they need.

Pediatric and Adolescent Gynecology

We will care for patients from newborn to 27 years of age. We aim to make your time with us as comfortable as possible — we are here to listen and to help. This means a quicker return to school, sports or other activities.

Paediatric and Adolescent Gynaecology

Gynecological surgery is used most often to treat ovarian cysts and pelvic pain.
