## Determinants of interstate migration in India. An exploratory macro

When the environment surrounding an organization is stable, managers tend to choose a mechanistic structure to organize and control activities and make employee behavior predictable. Defining international migration A proper assessment of international migration data at the world level must be based on a systematic inventory of what exists and what does not in each country. A further complicating factor is that the strategic value of specific resources, which is a major motive in favor of ownership decisions, is strongly dependent on business environmental changes.

## Migration from the rural region
