Carnivorous plants of Tasmania · iNaturalist Australia

The popular Venus flytrap is a well-known example, luring small insects such as flies to its open leaves with a sweet nectar scent; once the fly brushes up against a trigger hair, Venus snaps the leaves shut, trapping the fly, which it then dissolves with digestive enzymes. This incredible benchmark study offers a definitive, unparalleled and up-to-date examination of all carnivorous plants currently recognised from the continent of Australia 8 Byblis species; 1 Aldrovanda; 1 Cephalotus; 3 Polypompholx; 3 Nepenthes; 160 Drosera and 60 Utricularia. Pinguicula Popularly known as Butterworts, Pinguicula is a genus of carnivorous plants consisting of around 80 species.

Australian Carnivorous Plants

Where iron-rich rocks are present around the granite plutons of this region, and insoluble iron oxide and hydroxide chemical lag may form.

Carnivorous Plants of Australia Magnum Opus, Volume 1
