## 10. Vanishing Forests and Vanishing Species

But with increasing population and pressure on the land, in many places the fallow period is VANISHING FORESTS AND VANISHING SPECIES 119 cut short.

## The Amazon Rainforest Disappeared Way More Quickly This Year

When this value is invisible, forests lose: They cannot compete against the short-term windfall of timber or newly cleared land for agriculture. Take Rainforests for example, in just 100 years 50% have been wiped out on account of the amount of resources we are stripping from them. Our Solutions The value of the services that forests provide is immense, yet it remains largely invisible.

## 15% Of Climate Change Is Caused By Disappearing Rainforests

Rainforest Emergent Top Level - Costa Rico My Photo Rainforest Biomes Rainforest biomes are comprised of four different each having different types of trees, flowers, and other plants. This also impacts half of the world's species of plants, animals, and microorganisms. We must take action so that these forests, its plants and animals and us humans who depend on them continue to live.

## 9 Rainforest Facts Everyone Should Know

Without the forests, people migrate to cities, or move to richer countries in search of work. But these possibilities are speculative and require a great deal of scientific investigation. Food and Agriculture Organization and the U.
