

Soledon dyestuffs on spun viscose rayon piece goods.

Imperial Chemical Industries - Thai Rayon Fabric Manufacturers

Description: -

-Soledon dyestuffs on spun viscose rayon piece goods.

-Soledon dyestuffs on spun viscose rayon piece goods.

Notes: In slip case. Col. samples as illus.

This edition was published in 1954

Viscose rayon fiber production process

Technical service and samples are backed up with detailed literature, such as product datasheets and guide recipes. Nothing herein is to be construed as a warrant, express or otherwise. TYPICAL PHYSICAL AND CHEMICAL PROPERTIES Appearance Milky White Liquid Constitution Modified polysixane Ionic character Non-Ionic PH 4.

Viscose rayon fiber production process

Sliver is a more orderly arrangement of fibres in a loosely connected, continuous form suitable for. Technical service and samples are backed up with detailed literature, such as product datasheets and guide recipes. Storage Stable under normal conditions, the product should be stored away from heat and container should be properly capped all the time Cap the container after use.

Textile

There are four kinds of forces by which dye molecules are bound to fibre: 1 ionic forces, 2 , 3 , and 4 covalent chemical linkages. Technical service and samples are backed up with detailed literature, such as product datasheets and guide recipes. TYPICAL PHYSICAL AND CHEMICAL PROPERTIES Appearance Golden Yellow Liquid Odor Characteristic Chemical character Bacterial Alpha Amylase based preparation Ionic character Neutral Density at 20 oC Approximately 1 PH of 10% solution Approximately 6 — 6.

EP0665311A1

. Freedom under Patent, Copyright and Design cannot be assumed. William Perkin Murrmann, Johann Peter.

Solid Colour Rayon Fabric & Viscose Fabric

The first ranges of reactive dyes for cellulose fibres were introduced in the mid-1950s.

EP0665311A1

However, dyeing of textiles with indigo in a reproducible way is complicated.

Solid Colour Rayon Fabric & Viscose Fabric

This encouraged Perkin, his father, and brother Thomas Dix to construct a small factory to manufacture aniline purple at Greenford Green, north-west of London.
