Great Depression

Hoover's first measures to combat the depression were based on voluntarism by businesses not to reduce their workforce or cut wages.

Great Depression

New Zealand Main article: was especially vulnerable to worldwide depression, as it relied almost entirely on agricultural exports to the United Kingdom for its economy. You have written that the availability of these interventions is a pretty big problem? Orphaned children who endured these living circumstances for long stretches often found themselves in desperate situations as they grew into adulthood. Beef and dairy products comprised the bulk of exports, and Ireland fared well relative to many other commodity producers, particularly in the early years of the depression.
