**Nonfiction Book Review: Defending the Earth: A Dialogue Between Murray Bookchin and Dave Foreman by Murray Bookchin, Author, Steven B. Chase, Editor, Dave Foreman, With South End Press \$13 (160p) ISBN 978**

Deep ecologists reject any mechanical or computer model of nature, and see the earth as a living organism, which should be treated and understood accordingly.

Similarly, both agreed that protecting wilderness areas and fostering a new ecological sensibility and a direct moral concern for other species was an urgent task that could no longer be ignored or postponed. They also cite the work of environmentalists and activists such as , , , and others as being influential, and are occasionally critical of the way the science of ecology has been misused. Important grizzly bear habitat in the northern Rockies was tossed to the oil industry and the loggers.

**Defending the Earth: A Debate**

Perhaps never before has there been such a widespread political debate in the United States on the interrelationship between environmental ethics, nature philosophy, and radical social theory. There is an unconscionable maldistribution of wealth and the basic necessities of life among human beings that must be overcome. In many ways, I think they and Dave Foreman are doing a wonderful job.
