{2} FOULK M S, WAGGENER J M, JOHNSO J M, et al. Chromosoma, 2013, 122 1-2 :103-19. Ecdysis occurs in nematodes as well.

## Metamorphoses

Based on the stages of each life cycle, two types of metamorphosis can be identified. At this stage the larva will stop eating and moving. When it becomes an adult, molting does not occur.

CiNii 図書

Conclusion Molting and metamorphosis are two types of events in the lifecycle of animals. Some pages with old ink spotting.

CiNii 図書

EcR-RNAi and azadirachtin treatments induced the abnormal proleg development in *Spodoptera litura*.

CAB Direct

The main difference between molting and metamorphosis is that molting refers to the shed of body parts periodically such as body coverings, feathers, cuticles or skin whereas metamorphosis refers to the process of transformation from an immature form to the mature form through distinct stages. Curr Opin Cell Biol, 2001, 13: 244-248.
