Archaeological Approaches to Market Exchange in Ancient Societies is the first book to address the development, change, and organizational complexity of ancient markets from a comparative archaeological perspective.

We are what we eat: How the archaeology of food conveys expression of identity

Peer-reviewed, state-of-the-art studies on a selected topic cover important fieldwork and discoveries, and survey recently published literature in the featured area. I am particularly interested in how people in the past negotiated their place in the social, political, and economic world around them.

We Are What We Eat: How the Archaeology of Food Conveys Expression of Identity

Bibliography Includes bibliographical references and index. Classes that may still meet today are encouraged to move to online instruction. My ultimate goal with this new project is to build a long-term anthropological field program in the Nejapa region, based on holistic anthropological research and engaged, collaborative, community-based archaeological practice.

Emma Blake

Papers of the British School at Rome 76: 1-34 2005a. J of Mediterranean Archaeology 10.

Materials, Food, & Economics

Ambrose 171 10 Fields and Tables of Sheba: Food, Identity, and Politics in Early Historic Southern Arabia Krista Lewis 192 11. If we are to simplify it, we could study animal bones and plant remains in the archaeological record and conclude that human beings in the past ate seafood, red meat, lentils, or barley, for example. American Academy in Rome Press 2017.
