Accounting

The exploratory study examines a sample of Pakistani companies from various sectors. . The relationship between AMT and MAP is highly significant.

Management control in multinational companies: a systematic literature review

Findings reveal that every unit in an organization often followed different strategies.

Earnings management in domestic versus multinational firms: discussion of “Where do firms manage earnings?”

Theory examines a number of factors that support management when deciding on appropriate accounting practices.

Earnings management in domestic versus multinational firms: discussion of “Where do firms manage earnings?”

Anglo-Saxon countries refer to a more integrated approach, and thus in the English-speaking literature, the explicit differentiation between financial accountants and MAs is often lacking. Increasing geographical dispersion prompts the integration of non-financial controls Kihn ; Mongiello and Harris and challenges management information systems not least due to the different locations of experts and operations across different time zones Hyvönen et al.

Accounting

Finally, research in this field can be developed by comparing the situation in Pakistan with the introduction of a MAP to other developing countries, studying differences in cultural factors and other conditional factors. Regular communication ensures employee commitment to reporting procedures Brenner and Ambos ; Moilanen and facilitates knowledge transfer between units Cooper and Ezzamel ; Crespo et al.

Strategic management accounting and sense

In the following years, very diverse identity topics such as the link between role changes and identity reconstructions or the tensions between existing and idealized identities were examined. Similarly to PMS, budgeting has been a research focus over the whole period. Since 1999 expatriates and the transfer of shared values have been studied as means of control.
