Organic Chemistry Practice Problems

Following this acid-base reaction, carbonic acid quickly degrades into CO_2 and H_2O .

Further Challenging Problems in Organic Reaction Mechanisms

This work is of great value to organic chemists and researchers and organic chemistry teachers and students. The problems have been color-coded to indicate whether they are: 1.

Organic Chemistry Practice Problems

The symptoms of heartburn can be treated with a mild base, which acts to neutralize the excess HCl . Go ahead and give it a try! This permits the reader to solve the problem independently and then compare the results with those presented in the literature.

Challenging Problems in Organic Reaction Mechanisms

This permits the reader to solve the problem, either independently or with guidance from the Pathways and Pointers provided, and then compare the results with those presented in the literature. A link to each topic encountered in a given problem will be provided in the answer tab.
