Cancer de la prostate

Most men with prostate cancer do not die from it. For men at age 75, 10-year survival ranged from 19% 1. Sampling sites and number of cores
On baseline biopsies, where no prior imaging with mpMRI has been performed, or where mpMRI has not shown any suspicious lesion, the sample sites should be bilateral from apex to base, as far posterior and lateral as possible in the peripheral gland.

Prostanet

This SNP explains part of the increased risk faced by African-Americans. Active surveillance involves monitoring the tumor for growth or symptoms, which trigger treatment. Introduction Evaluation of life expectancy and health status is important in clinical decision-making for screening, diagnosis, and treatment of PCa.

Cancers de la prostate : vivre avec et après la maladie

The included studies applied a range of different screening measures and testing intervals in patients who had undergone prior PSA testing, to various degrees.

Cáncer de próstata

Sexual problems in men with prostate cancer in comparison with men with benign prostatic hyperplasia and men from the general population. Tiene el tamaño aproximado de una nuez y envuelve a la uretra el conducto por donde se vacía la orina de la vejiga.
