## Minnesota Satisfaction Questionnaire

The chance to work alone on the job. The chance to tell people what to do.

## Minnesota Importance Questionnaire

Development and validation of a measure of emotional intelligence.

## The Relationship between Job Satisfaction and Health: A Meta

The chances for advancement on this job. In the Paired Form, each need is paired with every other need, and the respondent picks the need in each pair that is the more important.

## [PDF] Minnesota satisfaction questionnaire: psychometric properties and validation in a population of portuguese hospital workers

It considers vital emotional issues as well as appeasing both personal and social difficulties. Translations The MSQ has been translated into a number of different languages. Notes Supported by VRA grant RD-1613-G.
