Early Outdoor Flowering Blooms from Woolmans

Citation: HortScience horts 54, 7; In summary, the sensitivity and trends of different cut chrysanthemums to 5-azaC are not the same because the growth indicators are not consistent.

Early Flowering Chrysanthemum Blooms

This will result in more flowers. Pest and disease prevention — All through the growing period plants are sprayed with an insecticide and fungicide, alternating the chemicals to prevent a resistance to a particular chemical. The first application was made when breaks following the second pinch were two inches long.

When Do Chrysanthemums Bloom?

Here are some I would try: John Wingfield and sports Wembley Courtier and sports Chessington and sports Venice and sports Chesterfield Lynn Johnson Gingernut and Yellow Gingernut Matlock and sports Trina Bell Please note: some of the products and suppliers mentioned in this article may no longer be available. Having bought the stools in from the cold and started them into growth in December, the first cuttings should be ready to take in late January to early February.

The responses of early

A marker stick was used to track the weekly growth rate. Prior to planting apply any needed lime or phosphorus based on a soil test. Citation: HortScience horts 54, 7; In , the squaring time is sorted from early to late.

Month by month guide for a cold (unheated) greenhouse:

Follow all directions, precautions and restrictions that are listed. None is yet showing colour in our frost-free, unheated greenhouse.

Chrysanthemums

Bring in spring-flowering bulbs that were placed in an outdoor plunge bed last year in the late summer or autumn. In sheltered gardens half-hardy, early-flowering chrysanthemums can be cut back to the ground in autumn and left to overwinter in the garden. However if you are going to grow for some time, or larger numbers and to improve your stock.

Autumn

Tender chrysanthemums should be grown in the greenhouse or in pots which can be placed outside in summer and brought in as the weather turns in autumn. If your mums survive the winter, you'll see new growth developing around the base of the plant in early spring.
