## Scotland's Future

For example, the multi-million-pound expenditure on the Churchill papers caused national outrage.

## Legal issues arising out of Medical Priority Decision making.

The Ministry wanted to introduce state-enrolled assistant nurses, but the nursing unions and the Mental Health Standing Advisory Committee argued that fully trained staff or student nurses should exclusively undertake mental health nursing. Labour will build on these developments through the establishment of regional chambers to co-ordinate transport, planning, economic development, bids for European funding and land use planning. Locally elected Area Health Boards were replaced by non-elected government appointed boards of directors for both RHAs and CHes.

## Legal issues arising out of Medical Priority Decision making.

For example, the North West PHO and the Institute for Health Research at Lancaster University have developed an introductory guide to GIS for North West Primary Care Trust Public Health teams, while the West Midlands PHO has developed MAIGIS, a pilot Multi-Agency Internet Geographic Information Service. The Scottish Public Pensions Agency will form the basis for delivering the additional responsibilities for public sector pensions that will be required in an independent Scotland. This can help adults who have had a stroke and their family or carers to make changes to their care according to their needs.

## Legal issues arising out of Medical Priority Decision making.

The Union also recognises the need for governments to act appropriately to protect public health.

## Level 3 guideline on the treatment of patients with severe/multiple injuries

It is possible we could reach a point where the decisions made in triage will determine whether potentially large numbers of individuals will receive life-saving treatment or not. However, this is a legal duty to promote such a service, not a duty to provide such a service. Department of Health, unpublished paper, 1977.

### **Towards evidence**

Based on this, and to ensure that people over 60 have similar opportunities for the surgery as younger people, the committee removed the previous age cut-off for considering surgery. This represents 42% of the disabled population and more than one-third of people over 65. For example, the RBS and Barclays received significant liquidity support from the US Federal Reserve at the height of the financial crisis.

### **NHS reform timeline**

But more spending has brought neither greater fairness nor less poverty. There were 267,220 notifications to the National Notifiable Diseases Surveillance System NNDSS between 1 July to 30 September 2017 Table 2. We will use our participation to promote employability and flexibility, not high social costs.
