Agritech making fruit more accessible for British Columbians

Storage: Good with promising CA potential and long shelf life Planting Trends: There is demand for this variety but perhaps it should be grown in only the earliest sites. The total labor cost estimated for harvesting a sea buckthorn orchard of 4 ha was 58% of the total cumulative production costs over 10 years Schroeder et al. Tree Description: Low to moderately vigorous and with flat branch angles and some blind wood.

Caution is advised when deciding whether or not to plant this variety. SEA BUCKTHORN CULTIVATION Sea buckthorn normally is transplanted or directly seeded in the fall or spring.

Product Development of Sea Buckthorn

With the official launch on June 24, 2015 of the Prepare Organic Food online toolkit, BC farmers now have the information tools they need to develop successful organic businesses.

BC Industry Councils

However, since the early 1970s the total volume of timber cut in the interior has exceeded that on the coast. We hope you enjoy this peek into the truly unique, often challenging, and always rewarding life of an organic farmer - and that you're inspired to learn more about the soil-nurturing, life-affirming philosophy and practices at the heart of the organic movement.

Agritech making fruit more accessible for British Columbians

Tree Description: Non-vigorous, spurry and fairly precocious. Alternatively the crushed berries or extracted juice may be treated with a

preparation containing pectinmethylesterase PME Lui and Lui 1989 , or perhaps treated with one of the many commercially available hydrolytic enzyme preparations.
