The Swedish mining company Aktiebolaget Spetsbergens Svenska Kolfä It was founded September 4, 1916, with the purpose of opening a coal mine at Braganzavågen, innermost Van Mijenfjorden, Spitsbergen, where promising coal seams had been found. In North America alone he estimates their combined area at 225,000 square miles, which seems conservative in view of Canada's legions of unnamed and unsurveyed bodies of fresh water. The pollution produced affects , climate, food, and human health.

Environmental & Wildlife Treaties & Agreements to Which Canada is a Signatory Party

At the urging of Frederic Church and others, Lord Dufferin — the Governor-General of Canada — came out in favor of preserving the Falls in their natural state in 1878.

It establishes a common factual and technical, base between the governments, the essential first step in successful negotiations Lemarquand 1993, 77.

Transboundary smoke haze pollution in Malaysia: Inpatient health impacts and economic valuation

Wolf-Dietrich Krüger of Siemens Power Generation for his unwavering respect of our Westinghouse history and keen support of all our 100-year anniversary activities; and Lindsay Scott of Siemens Westinghouse for his many entertaining and intriguing stories about our past that fired my imagination and instilled in me the desire to attempt to write a comprehensive history of our organization in honour of our 100-year anniversary. This particular design type led to problems for several World War II German cruisers and battleships with triple-screw arrangement when they were damaged in the stem, as they then were more prone to serious damage from the whipping phenomena which occur whenever the extremities of a ship are subjected to explosion-induced forces.
