Orthodoxy

History Main article: The Church's history records the progress of Christ's work throughout the course of the human experience. In it, Christians work out their salvation with fear and trembling 2:12 , worshipping the Holy Trinity in spirit and in truth.

Orthodoxy

What does this have to do with anything, let alone Christian orthodoxy? It is precisely in this way that Chesterton wakes a person from their philosophical stupor—by relentlessly poking at an idea that may not seem to underpin the whole system, but the whole comes crashing down to reveal what a small, unlikely, pitiful rivet held it all tenuously together. Another typical Western view is that Constantine initiated the process whereby the Eastern Church became subject to and dominated by the Emperor—a state of affairs called caesaropapism. Constantine helped to build churches at some of these sites, including the Church of the Holy Sepulchre, and Jerusalem quickly became a great center of pilgrimage for the entire Christian world.

Constantine the Great

By this is meant that the Church is undivided and not many one , sanctified and set apart for the work of God holy , whole and characterized by fullness and universality catholic , and has at its essence the going out into all the world to preach the and the nations apostolic.

Introduction to Orthodox Christianity

Lieu and Dominic Montserrat New York: Routledge, 1998 , 3. This is the doctrine of the , that God became a man. I'll not write a comprehensive review, but just wish to list some of the things that particularly impressed me on first reading.
