## Water in the American West

Okanagan Lake is also greatly impacted by Eurasian water-milfoil EWM; *Myriophyllum spicatum* L. A GIS-based step-wise procedure for assessing physical exposure in fragmented archipelagos. This plan can be found on the Service's Web site at:

## Modeling habitat suitability for the Rocky Mountain ridged mussel (*Gonidea angulata*), in Okanagan Lake, British Columbia, Canada

Stott reported that there are three packing companies in the Northwest, counting Utah, Washington and Idaho, that market about half a million animals each year.

## North American Sagebrush Steppe

Map of the with the Snake River highlighted in yellow and the Columbia River in blue Much of the area along the river, within a few miles of its banks, is irrigated farmland, especially in its middle and lower course. The taller-statured crested wheatgrass plants reduced the spread of propagules by physically intercepting them, and increasing the distance medusahead plants had to disperse propagules to find suitable sites for establishment in adjacent sagebrush-grassland communities.

## Composition and Diversity of Microbial Communities Recovered from Surrogate Minerals Incubated in an Acidic Uranium

In addition, pursuant to section 6 of the Act, the State of Washington would be eligible for Federal funds to implement management actions that promote the protection and recovery of Untanum desert buckwheat and White Bluffs bladderpod. A comprehensive conservation plan CCP for the Monument has been completed that provides a strategy and general conservation measures for rare plants that may benefit White Bluffs bladderpod.

Motorized Recreation Management challenges arise when values and perspectives of stakeholders concerning types of recreation and their impacts on the environment are very different.

### **Composition and Diversity of Microbial Communities Recovered from Surrogate Minerals Incubated in an Acidic Uranium**

Since wildfires are unpredictable with regard to their location and intensity, a fire management plan is necessarily designed to be a response, rather than a regulatory activity. The Commission is worried about not having enough cold, very few hours dip below twenty degrees, and the insect problems that could ensue.
