## General Botany Laboratory Manual By Jerry G. Chmielewski & David Krayesky

You are welcome to work in the lab outside of regularly scheduled classtime, but except for scheduled appointments, your instructors may not be available to help you during unscheduled times. Let the loop cool, then retrieve a little algal material and place in a drop of water on a slide, adding cover slip. This laboratory is fundamental, yet integral to your understanding of General Botany.

### [PDF] Laboratory Manual For Applied Botany

Each of you will have your own microscope every week, no exceptions. You may need to tease masses of algae apart with dissecting needles or forceps before adding the cover slip to avoid making preparations that are too thick to see through. Preparing for lab exams: A list of genera for which you will be responsible will be provided at least one week prior to the lab exams.

### A Laboratory manual for the study of general botany (1924 edition)

You will be informed of the location of a key to the lab but be careful to return the key, and to lock up the room before you leave the lab.

### Algae

At no time will questions be answered re where is a particular structure, etc. Click Get Books and find your favorite books in the online library.

### Algae

In some laboratory exercises you will be asked to identify structures of an organism

### Biology 227

For example, Examine slide 9 labeled Rhizopus sporangia w. You are welcome to come to lab outside of regularly scheduled class hours no other class uses the room. Also, by exposing students to society's historical connection to plants, Levetin and McMahon hope to instill a greater appreciation for the botanical world.

## **Algae**

This laboratory is fundamental, yet integral to your understanding of General Botany.

**Laboratory outlines for general botany, for the elementary study of plant structures and functions from the standpoint of evolution :  
Schaffner, John Henry, 1866**

Each of you will have your own microscope every week, no exceptions. Studying microalgal samples: Algal samples may be provided as unialgal cultures no other algae present , or as mixtures.
