Unit Studies cover most of the chemistry and physical science topics. And why does it have to go away, just when you start to have fun? Water
Judith Anderson How do raindrops change as they fall from the clouds and then seem to disappear before appearing as clouds again? Amy
Krouse Rosenthal Two unseen narrators argue about whether they are observing a duck or a rabbit.

Picture Books for a Community Scientist — Doing Good Together™

Learn that you need to look carefully before you draw conclusions.

Childrens' science picture books

The Perfect Follow-up STEM Challenge: Have your students brainstorm a list of common problems that they encounter at home, at school, or elsewhere in the world, then use everyday items to design a invention to solve that problem. Since science picture books have been such a wonderful thread of learning over the years for us, I thought it was high time to pull together a mega list of our tried and true favorites. Mineko Mamada This deceptively simple concept book prompts the reader to compare pairs of objects and then choose which one has a particular attribute.

Top 10 Read Alouds for Elementary STEM

But if your mind is narratively oriented like mine, you might be attracted to some of these spectacular works of scientific art that absolutely dazzle, no age limit required. We would learn everything we could in all of the subjects with books as our base. We consider nature walks to be our outdoor science labs and spend indoor hours reading, researching, and sometimes completing hands-on projects.

National Geographic Little Kids First Big Book of Science by Kathleen Weidner Zoehfeld, Hardcover

This way we are both getting what we need and learning together along the way.

Top 10 Read Alouds for Elementary STEM

Consider the books an extra bit of goodness during science — or even just as great selections to use during read aloud or quiet reading time.

Hervé Tullet This is a quirky book that is designed to be used in the dark, with a light source, to make designs on the ceiling. The Perfect Follow-up STEM Challenge: Have your students design and create a prototype for a new or improved toy or game using items around the classroom.
