## The Blackwell guide to medical ethics by Rhodes, Rosamond, Francis, Leslie, Silvers, Anita

This casebook offers a real-life view of ethical situations as they unfold, including case-by-case consideration of critical background information, key stakeholders, the direct relevance of specific APA principles and standards, and suggested steps to resolve ethical issues. Other ethical issues considered include surgical complications, patient autonomy, rights of the retarded, informed consent, euthanasia, and the fair allocation of finite resources. Discussion questions following each case help you appreciate the moral complexity of the situations and offer guidance for structuring possible answers.
