Behavioral Interventions for Prevention and Control of Sexually Transmitted Diseases
-Behavioral Interventions for Prevention and Control of Sexually Transmitted Diseases

Notes: -
This edition was published in June 6, 2007

Filesize: 62.106 MB

They were heterogeneous in terms of intervention length, content, intensity and providers. This authoritative resource is sure to influence public health practice and policy in an ever-evolving social climate. Attitudes to sexual health and behavioural intentions in the intervention group were improved in most studies which had a control group, but when interventions were compared with standard sex education, most studies did not find statistically significant differences between the groups.
